\* Disclaimer: SinLink and  
Authors disclaim responsibility  
for the results of hardware  
modifications to your computer  
system..  
If you are not SURE of your  
capabilities, get someone with  
more experience to help you...

\* What is SinLink?..  
SinLink is the name of the  
original publication of the  
Group Using Timex Sinclair  
Cambridge of Silicon Valley  
(GUTSC/SV)..  
SinLink was first published in  
April, 1982..  
Parts of SinLink are usually  
printed in TIMELINEZ, the  
publication of Timex Sinclair  
Cambridge East Bay 280 User  
Group (TSCBZUG), Timex  
Sinclair Cambridge Peninsula  
User Group (TSCPUG) and  
GUTSC/SV...

\* What are the advantages of  
'subscribing' to SinLink?..  
The purpose of most user groups  
is to share information..  
The best way to do this is thru  
a newsletter, since most  
members cannot attend every  
meeting..  
If you have a problem (or a  
solution), the best way to ask  
for help (or give help) is thru  
the newsletter..  
The newsletter also usually  
contains information about  
other User Groups around the  
nation and world that we gather  
thru our newsletter  
exchanges...

\* How do I 'subscribe' to  
SinLink?..  
For User Groups (even small  
ones- there is nothing wrong  
with a one person User Group  
that puts out it's newsletter  
on a TS2040), we would prefer  
to exchange newsletters on disk  
(or paper) if disk is not  
available..  
If you just can't exchange  
newsletters, the best way to  
'Subscribe' to SinLink is thru  
SLIX (SinLink Information  
exchange)..  
Send us some Sinclair/ Cambridge  
related information and we will  
send you a current SinLink and  
a 'SLIX Contacts' printout with  
your information in it so that  
you can check it for accuracy  
and suitability..  
Mail exchange newsletters or  
information (on disk or paper)  
to:..  
SLIX..  
c/o Bill Miller 408-253-3175..  
--- 6675 Clifford Drive..  
--- Cupertino;; CA\_95014-4530..

You may also call your  
information in to the telephone  
number listed above..  
The information will become part  
of the Permanent SLIX Database  
which will be made available to  
all SLIX participants in as  
many disk formats as we can  
manage..  
The preferred method for  
exchanging information is as  
ASCII text on 3.5in or 5.25in  
floppy diskette using:..  
\*\* MFM (Modified Frequency  
Modulation- double density)..  
\*\* 80 or 40 cylinders..  
\*\* (2) tracks (heads) per  
cylinder..  
\*\* (9), (10), or (11?) 512 BYTE  
sectors per track..  
The preferred disk formats (in  
descending order of preference)  
are:..  
\*\* QL 5.25in, 720K..  
\*\* QL 3.5in, 720K..  
\*\* TS2048 Larken, JLO, or  
AERCO; 5.25in or 3.5in;  
159blocks (cylinders,  
tracks?)..  
\*\* TS1000? Larken, JLO, or  
AERCO; 5.25in or 3.5in;  
159blocks (cylinders, tracks)..  
\*\* MS(PC)-DOS 3.5in, 720K  
(Preferred Standard, 3.5in)..  
\*\* MS(PC)-DOS 5.25in, 360K  
(Preferred Standard, 5.25in)..  
\*\* QL Cartridge or other Disk  
Formats (Single Sided, 3in,  
etc.)..  
\*\* Other TS formats (Stringy  
Floppy, Wafadisk, Cassette  
tape (read only))..  
\*\* MS(PC)-DOS 3.5in, 1.44MB..  
\*\* MS(PC)-DOS 5.25in, 1.2MB..  
\*\* C64/128 3.5in, 800K..  
\*\* C64/128 5.25in, 340K..  
\*\* Amiga 3.5in, 880K..  
\*\* Macintosh 3.5in, 400K..  
\*\* Macintosh 3.5in, 800K..  
\*\* 'NeXT' 256MB Optical Disk..  
If you don't have a system that  
can read and write any of these  
formats, or you can't exchange  
information for some other  
reason, you may subscribe to  
SinLink for \$15.00 per year..  
Make check or money order  
payable to SinLink..  
Mail to:..SinLink..  
c/o Bill Miller 408-253-3175..  
--- 6675 Clifford Drive..  
--- Cupertino;; CA\_95014-4530..  
  
SinLink subscriptions are  
currently fulfilled with  
TIMELINEZ...

exchanges for July, 1989  
(29)!!...

Sc890730.1150-.1204\_BeverSC;;  
Call from: Scott  
Bever 408-246-5320..  
Scott found out about us from  
Computer Currents..  
He has FOR SALE:..  
ZX81..

(2) 16K RAMpacks..  
TS2040 printer..  
(3) rolls paper..  
Machine language book..  
Scott asked how much we thought  
the system was worth..  
Since Zebra is selling ZX81's  
for \$7 to \$15, 16K RAMpacks for  
\$5, and Alpacom 32 printers  
for \$25; we guesstimated \$0 to  
\$25..

Scott said if he isn't able to  
sell the system, he would like  
to use it to control a Hero  
Robot. He teaches a class at  
Foothill College about Robotics  
and the College has about 10 of  
the Hero Robots..

He promised to try to contact  
Jim Strobe and inform us if Jim  
still has information on  
TS1000s controlling robots..  
He will be moving to Berkeley  
after Aug. 28..

(Dated: 05-04-89 01:00:00 to  
06-21-89 23:04:00) from:  
Sinclair Echo on Fidonet..  
Letter from Petes..  
"Dear Bill,...

I was rather taken aback (I knew  
all these years in college  
would pay off---) by your  
question regarding "my" user  
group list. The one you refer  
to, I never intended for  
publication. I was still  
compiling it and sent it to the  
editor of L.I.S.T.ing for  
additions/ deletions. In those  
days LIST printed anything they  
got. It is a very dated list,  
many of the records were no  
good in 1985 when LISTing  
published it. Tim Woods  
published a MUCH better one in  
TIME DESIGNS, May/ June 88..  
Inadvertently you've done a  
disservice by publishing that  
ancient list. I hate to see  
people waste money and time on  
bad addresses..  
Did you know about the Sinclair  
Echo on Fidonet? It started in  
Portland by Ed Grey and Rod  
Gowan. Now it's pretty  
interesting. Maybe you guys in  
the Bay Area might find a  
friendly Fido sysop somewhere..  
Enclosed please find an envelope  
for Bob Orrfelt. I don't have  
his address. If you can put it

on the envelope & drop it in  
the mail, I would appreciate  
it. It's money for his TS1500  
schematic..  
Also find messages from Sinclair  
Echo..  
Adios,..  
Phoenix Pete"..  
..

Petes:..  
Thanks for the info. It is now  
part of our permanent data base  
with the exception of the  
Sinclair Echo messages. Could  
you send them on disk?..  
Thanks for clarifying the age  
and background of the User  
Group List. How do you suspect  
it got on disk? We suspected  
you posted it to a BBS, but  
apparently that isn't what  
happened..  
We have investigated a gateway  
to Fidonet and the Sinclair  
Echo, but so far haven't had  
any luck. We may find out  
something at the 890824-27  
"FidoCon 1989" meeting in Santa  
Clara..  
We have been investigating  
creating a "Sinclair Archive  
Site" on Unnet (Usenet,  
Internet, Milnet, Arpanet). Do  
you have access to any of these  
networks?..  
Hope to hear from you soon..  
...

M. Dally acd-tel-numb..  
P.O.Box 2011..  
Yorba Linda;; CA 92686..  
...  
A GASE is inclosed. Thanks!..  
...

"July 21, 1989"..  
Dear Mr. Miller..  
I saw you listed in the COMPUTER  
SHOPPER "USER GROUPS"..  
I have the Timex 1000 computer  
and a good keyboard. I need  
ideas, etc. ...  
I have several programs but I  
want to be able to use a  
standard printer like Panasonic  
109111 etc. 80 columns..  
Increase the RAM. At present I  
have 32K..  
Would appreciate information and

more about your group..  
Enclose(d) a stamped addressed  
envelope..  
Thankyou..  
M. Dally..

..  
Thank's for your interest..

(Reported by Andy Hradesky)..  
Attendees: Jack Dohany;; Pat  
Morrissey;; George and Sonja  
Mockridge;; Andy, Stephanie and  
Christopher Hradesky;; Norm  
Lehfeldt;; John Hancock;; Walt  
Johnson?..  
Jack Dohany reports he is  
investigating hooking TS  
computers to an 8088 clone thru  
serial ports..  
...

Sc890715 BurtonEV;; Visit to: Ed  
Burton 209-384-2399..  
Ed returned the SLIX Spectrum/  
Wafadrive Development Kit  
(loaned by A&J Microdrive) we  
loaned him about 870617..  
He reported he hadn't used it in  
about a year and since he  
wasn't able to use the Spectrum

with with his TV, he hooked the Wafadrive to his TS2068 thru a Spectrum Buss & ROM Converter.. Ed reported on his project to set up a Video Tape Rental Store Computer System using: 8088 clones; Novell network cards; and Turbo Pascal.. Ed also loaned us the documentation for MINI XMDD 1.5 and 1.7 (15pages) for the TS1000 and TS2050 or BYTE-BACK MODEMS..

Sc890713.1055-.1109 SwensonTC;;  
Call from: Tim Swenson 703-820-6657..  
4703 West Braddock Road #104..  
Alexandria; VA 22311..

Tim reports he has a new address and phone number, but will not be at them until he returns from Keesler AFB (in about 3 months, he is going to Keesler on July 23)..

He also reports he no longer has Unnet access..

He has recently added a C16 and Vic 20 to his computer inventory..

He promised to contact us from Keesler when he gets there..

Sc890710.2021 BakerRC;; Call from: Randy Baker 415-594-0115 (# 881018.2114)..

Randy called to inquire about a source for a monitor for his TS1000. We suggested a Samsung mono monitor for \$70 from Belmont Computer Products (BCP 415-598-9058)..

He also reports he is awaiting word on being a "NeXT" developer..

He has joined the Boston Computer Society in the "NeXT" and "Robotics" SIGs..

Sc890707.1410 ZebraC;; Call to: Zebra 718-296-2385 (Stewart Neufeld).. We reported our success? at

copying the interface PALS and ordered a "Zebra FDD 64K & CP/M Upgrade" for \$30.00..

Stewart told us that in answer to Bob Cowger's question, he still has about 3000 ZX81 kits plus used ZX81's..

Sc890707\_A&JV;; Visit to A&J Assembly (Microdrive, Exatron), A&J 408-281-1000..

We visited A&J with Bob Orffelt to help out with Bob's Timex Portugal Disk System Documentation Project. The goal was to document the two

Programmable Array Logic (PAL) chips on the interface board.. We were able to read the chips Bob had and program 3 each of the two fuse patterns.. We saved these patterns to disk as ASCII files named: TIMEXU16 JED and TIMEXU40 JED.. We also saved the Boolean Logic as ASCII files named: TIMEXU16 PL2 and TIMEXU40 PL2.. Although the PAL programmer said the copies were identical to the originals, the Exatron tester said one of them was not..

Bob plans to test them in his system and see if we have really documented the PALS.. Thanks to Jim Howell of Exatron and Bob Howell Sr. of Exatron for demoing the PAL programmer, PAL Boolean Logic decoding software, PAL programming software, and Exatron PAL tester for us..

Sc890705\_PC\_UNIX\_SIG\_62 meeting..

Topic: Open Desktop..  
By: Alan Ginzberg, Santa Cruz Operation (SCO) Director of Strategic Marketing..  
Group Computer System report:.. The Group Computer System had some problems during it's first month of operation and lost it's user file..

To contact SLIX on unnet we have replaced the old address (svcs!bill) with 3 new addresses:..

unnet!svcs!slx (Bill Miller)..

unnet!svcs!wahl (Mark Wahl)..

unnet!svcs!steve (Steve Nichols)..

To cut down cost, we will only receive mail, not send it, but if you will include your U.S. Mail address in your message, we will try to answer your message by U.S. Mail until we get our Unnet mail funding worked out..

..

(. . .)..  
..

Dear Sir,..

I recently noted in the Computer  
Shopper that your group  
supports the Sinclair Timex..  
I happen to have a Timex 1000  
which I have used a great  
number of times in the past. I  
am interested at the present  
time in trying to find more of  
the same (or something  
similar). I teach school. I  
would like to have something as  
small as the Timex for the  
children to take home - hook up  
to a TV set - and do their  
homework. I can program for the  
Timex and like to do so..  
..

If you have any information as  
to where I can buy these little  
1000's or like machines - I  
would appreciate the  
information. I am very serious  
about this..  
..

Any information that you have  
will be appreciated greatly..  
..

Sincerely yours,..  
Bob Cowger\*\*

Bob:..  
Your plan sounds interesting. It  
would help other TS users if  
you would keep us informed of

your progress..  
What type of homework do you  
plan to have the children do?..  
An article for our newsletter  
would be much appreciated..  
Do you have access to a computer  
with disk drives? Perhaps we  
could exchange information on  
disk..  
..

We can't find any information on  
current suppliers of TS1000's  
but our newsletter usually  
carries ads by people with used  
TS1000s FOR SALE..  
Recent TS1000 FOR SALE ads  
include:..  
..

Jerry Skiver 408-629-9713  
(Sc890526)..  
Tim Azzaria 415-342-2208,7424  
(Sc890613)..  
..

Back issues are available for  
\$1.00 each or on disk (MSDOS or  
C64) for an exchange disk..  
Hope this helps. Hope to hear  
from you soon..  
...

Sc890703.1243\_CooperJC;; Call

Sc890628.BUTSC/SV 4;; Group  
 Using Timex Sinclair Cambridge  
 of Silicon Valley meeting.  
 Attendance: 4..

Mark Wahl demoed his animated  
 3-D graphics program for the QL  
 based on a program by Tim  
 Swenson..

Bill Miller brought the current  
 SLIX files and newsletter  
 exchanges and showed the  
 beginnings of a "File Server  
 Transaction Record" system..

Terry Greenlee reported on a  
 Silicon Graphics fast hardware  
 graphics demo he attended. The  
 demo was given on a 680XX under  
 UNIX and on an 80386 under  
 MSDOS. The folks giving the  
 demo reported that UNIX for the  
 80386 did not seem to be stable  
 enough yet for a fast graphics  
 system..

Steve Nichols borrowed Mark's  
 Minix book: "Operating Systems;  
 Design and Implementation" by  
 Andrew Tanenbaum..

Steve also reported on a UART  
 which enables a client computer  
 to communicate with it's file  
 server at up to 100,000 bits  
 per second..  
 ...

Sc890628.1034-.1056 SwensonTC;;  
 Call from: Tim  
 Swenson Sc890615..

Tim called to check about a CP/M  
 computer with Bin drives that  
 he found FOR SALE on Usenet..  
 Although it has a local phone  
 number (408-926-8636) we  
 haven't been able to coordinate  
 schedules with the folks to go  
 see it. Also, the Bin drives  
 are so heavy they might be  
 impossible to ship to Tim in  
 Virginia for anything like a  
 reasonable price (the system  
 was advertised for \$50)..  
 Tim also said he will send us  
 the latest index to the SLIX  
 files that he has done on his  
 SUN at work..

Tim has been unable to transfer  
 files between the SUN and Steve  
 Nichols' BBS using NAM and TIP  
 on the SUN..

Steve suspects it is because Tim  
 needs two keystrokes to get to  
 his file transfer program(s)  
 and Steve's BBS program acts on  
 one keystroke..

We suggested trying to contact  
 Steve and Mark Wahl on the  
 LogOn/SV BBS 408-745-0880, TS  
 message base 17, and trying to  
 work out the problem, so we can  
 exchange files on Steve's BBS  
 in case we can't get back on  
 Usenet..

We also suggested that Tim try  
 to send us technical  
 information on NAM and TIP for  
 the SUN so that we might  
 investigate what the problem  
 might be..  
 ...

Sc890627.2018\_SkiverJC;; Call  
 from: Jerry  
 Skiver 408-629-9713..  
 Jerry is planning to sell his  
 TS1000 AERCO disk drive system  
 to Richard Matejovic, but he  
 seems to have lost the system  
 disk..

We suggested he try Sherman  
 Lee 408-251-0270. We also  
 suspect the system program may  
 be on every disk formatted by  
 the system..  
 ...

Sc890627.1553 HarrisBC;; Call  
 from: Ben Harris 212-885-0503..  
 34 Schofield..  
 City Island;; NY\_10464..  
 ..

Ben found out about us from

Computer Shopper. He has a  
 TS2068 on which he has never  
 saved a file. He is looking for  
 sources of software..

Ben promised to send us a list  
 of letters returned from TS  
 Vendors who are no longer  
 active..  
 ...

Ben..  
 It was good talking to you..  
 For software, try..  
 RMG 503-655-7484 (commercial)..  
 Mel Nathanson 813-863-5552  
 (shareware)..  
 We look forward to your list of  
 letters returned from TS  
 Vendors who are no longer  
 active..  
 ...

Mark Wahl demoed his MSDOS disk reader program (written in SuperBASIC) on an ESFC QL..  
Jack Dohany and Bob Orffelt report they are working on software to allow a TS2068 to edit MSDOS text files as large as the TS2068 diskette can hold..  
This software should also be able to format, write, and read an MSDOS diskette..  
Walt Johnson and Norm Lehfeldt demoed their Z88's..  
Bill Miller reported on a "Timex Sinclair File Server" project to connect Timex Sinclair computers to a low cost "File Server" to which could be connected low cost floppy disks, hard disks, optical

disks, or other SCSI or clone devices..  
He also reported on SLIX unnet access; unnet address:..  
...

unnet!svcs!bill ..

Note: As of July 5, 1989 this address is changed to:..  
...

unnet!svcs!slx (Bill Miller)..  
unnet!svcs!wahl (Mark Wahl)..  
unnet!svcs!steve (Steve Nichols)..  
...

If you have unnet access, send us a message and we will try to send you one back..  
We have only had this access for about a week, and we are still learning to use it, so bear with us..  
Bill also brought the current SLIX and SincLink files on both paper and disk..  
...

Sc890617.TSC\_SIB/TCW\_10..  
New meeting attendee: Gunter Steffen. Gunter learned about us from Ralph Muraca. He has had an XT for about 3.5yrs which he uses for word processing, spread sheets, and data bases. He also uses Autocad 5.2. He is interested in a 386..  
...

Sc890615.1507 SwensonTC;; Call from: Tim Swenson Sc890612..  
Tim is interested in "Minix" for the QL to learn more about Minix and Unix..  
We told him to put in his order to Mark Wahl on Usenet..  
Tim reports he received Mark's first three Usenet messages and has answered them all..  
We promised to send Tim our additions to the keyword file..

Sc890614 BennettDN;; Note to:  
Dave Bennett\_Sx890606..  
Dave:..  
We suspect we cannot send TS  
executable files (TS1000,  
TS2068, or QL) conveniently on  
MSDOS disks, since there seems  
to be no place for the Sinclair  
header information..  
We are investigating UNIX TAR  
and SHAR formats. Sinclair  
computers seem more compatible  
with UNIX than with MSDOS..  
Since you can read MSDOS disks  
with the programs you have, you  
really don't need MSDOSCPY..  
There are also some MSDOS file  
manipulation routines in BASIC  
in ESFCmenu. GO TO 5085 seems  
to print out the directory of  
an MSDOS disk..  
Thanks for the exchange  
diskette, the TS Fest report,  
and the SAM report. As you can  
see, they are now part of our  
permanent data base..

Rochlis..  
Massachusetts Institute of  
Technology..  
(. . .)  
February 9, 1989"..  
...

\$ Notes..  
"Hello Bill..  
I hope you and/or Mark find this  
document interesting. It  
explains what happened in  
layman's terms..  
Also I'll look into getting some  
better output on that SLIX  
index on the SUN. Could you  
please send me the most up to  
date SLIX files? That is, all  
the ones that are not included  
in the index. I'll go ahead and  
put them in. Thanks..  
I'll keep this short..  
Happy Hacking,..

Tim..  
Tim:..  
Thanks for the document and for

all the work you have done on the SLIX index..  
As you have probably discovered from your experiments with Usenet, managing all this information is an interesting problem..

You mention "all the SLIX files"..  
Depending on how we define it, this could be a lot..

As you know, we have been investigating the design of a "Sinclair File Server" which would serve TS1000, TS2068, QL, or Z88 computers as Clients.. We suspect this would use 8088, 80286, or 80386 clone Cases, Power supplies, Mother boards, Disk controller cards, Serial cards, and perhaps MODEM cards..

We suspect a "Minix" derivative would be the most likely operating system..

For that reason, "SLIX files" may include all the Minix articles from Usenet (10 to 30MB)..

Also, "SLIX files" may include all the newsletter exchange files we have received on disk even if we didn't have room to publish them in SinLink..

The point is, we suspect we only want to work with ScYYMM files till we get a system we are pretty comfortable with..

With that in mind, we have put the following files on the enclosed disk:..

..  
D\Filename.ext Bytes..

Ss89612a\_lis 2193..

Su89611a\_lis 9391..

Sn896\_lis 12132..

Sx89t88\_lis 18630..

Sc8905\_fis 29694..

Rn896\_lis 7815..

Rn895\_lis 8141..

Sc8903\_lis 48148..

Sc8806f8.doc 52903..

Ts881t6\_lis 149536..

Sc87c10a\_exp 16835..

Sp87c03a\_exp 2088..

Sx87c02a\_exp 22379..

Sc87b06a\_exp 16835..

..  
These should fill in the gaps in your file list back to about Oct. or November of 1987 and give you a large variety of file types to experiment with.. The "exp" files are Spectrum "Spectral Writer" (probably "Tasword" compatible) files, just as they were Exported

(printed) to the QL serial port from the WafaDrive serial port..

Good luck, and thanks again..

Call from: Tim

Swenson Sc890606..

Tim reports he needs more

SinLink files to index!..

We promised to send him all the

files for 1988 and 1989 so far.

He printed out the index for

the files he had and it took

40pages. Perhaps multiple

columns would help. Tim is

going to investigate formatting

a 5.25in 720K MSDOS diskette on

the 1.2MB drive in his Tandon

AT at work..

Tim also reports he will be

going to Texas in late July for

4 months..

"27 May 1989..  
...

Hello Bill,..

Enclosed you will find two 80  
track disks. The one disk (.  
.) should contain the ROM  
disassemblies you wanted. The  
other disk has the SLIX index

file that I did on the Sun. I  
tried to neaten up as much of  
the file as I could (it's  
awfully big). I also included  
the keyword file and the shell  
script that created the file.  
The script is written for the  
C-shell in 4.2BSD UNIX. You  
might find it interesting..  
Let me know if you ever get some  
CPU time on that UNIX computer  
you mentioned when we last  
talked on the phone. I am  
willing to write some shell  
scripts for you. I will write  
them on the Sun and then port  
them over to your machine, that  
I am assuming is running System  
V UNIX..  
Oh, you'll be glad to hear that  
can now read Usenet articles.  
I am working on how to save  
them and copy them to my Sun.  
If you know of any newsgroups  
you want me to scan for you,  
let me know. I also have a DDN  
account. It is:..  
tswenson@daic.mil..  
I can send messages to persons  
that have Usenet addresses.  
The people at Stanford told me  
how..  
That's about all I have to say.  
Let me know if you find any  
more things for me to do. I am  
more than willing to give a  
hand..  
Happy Hacking,..  
Tim Swenson"..
